IEEE Transactions on Power Delivery

[Publications O&P Manual](#) [PDF 2MB]

Impact Factor: 3.7

Scope:

The scope of the IEEE Transactions on Power Delivery embraces innovations in electric apparatus for power delivery with a main focus on power transmission and distribution components. It also covers apparatus modeling, analysis, implementation and application issues such as power system protection, instrumentation, communication, and grounding; electromagnetic transients and power quality; and substation automation. The Transaction's scope further includes research works leading to power engineering standards.

Peer Review

The articles in this journal are peer reviewed in accordance with the requirements set forth in the [IEEE PSPB Operations Manual](#) (sections 8.2.1.C & 8.2.2.A). Each published article was reviewed by a minimum of two independent reviewers using a single-anonymous peer review process, where the identities of the reviewers are not known to the authors, but the reviewers know the identities of the authors. Articles will be screened for plagiarism before acceptance. Corresponding authors from low-income countries are eligible for waived or reduced open access APCs.

About resubmission of a rejected paper

Rejected papers should not be resubmitted without being substantially revised. After revision, rejected papers can be resubmitted no sooner than 3 months after the date of the rejection. A resubmitted paper will be treated as new submission and must adhere to the same page limit as any other newly submitted paper. If the paper is rejected for the second time, the paper cannot be resubmitted any more even if further modified. The authors must also indicate in the letter to the editor how the paper has been modified. Since the resubmitted paper is not treated as a revision, the authors should not include a separate document in which they address the comments of the reviewers. All modifications should be briefly stated in the letter to the editor. If the paper was rejected from one of the PES journals and the authors have revised the paper and resubmit it to another PES journal they must also indicate in the letter to the editor which journal the paper was submitted to originally and what was the reference number of the rejected paper.

Policy on papers published at PES financially sponsored conferences:

The Authors who have presented the paper(s) at the IEEE PES financially sponsored conferences listed below are eligible to submit the extended version of their conference paper(s) to one of IEEE PES Transactions for consideration of publication. The extended paper requires at least 60% additional new material relative to the original conference paper and is subject to a regular review process of the respective PES Transactions. The original conference paper should be referenced in the extended journal paper and new contributions with respect to the conference paper clearly identified. The final decision for publication on the extended paper is made by the Editor-in-Chief of the respective journal.

- PES General Meeting
- IEEE/PES Transmission and Distribution Conference and Exposition (T&D)
- IEEE PES Grid Edge Conference & Expo
- PES Innovative Smart Grid Technologies (Latin America, Europe, Asia, Middle East)
- PES PowerTech
- PES PowerAfrica
- IEEE PES GTD Grand International Conference and Exposition Asia (GTD Asia)
- IEEE Electrical Energy Storage Applications and Technologies Conference (EESAT)
- IEEE PES Energy & Policy Forum
- IEEE PES Asia-Pacific Power & Energy Engineering Conference (APPEEC)

Calendar of Events

Don't miss leading industry events, educational opportunities & more.
