In partnership with Wiley, the IET have taken the decision to convert *IET Generation, Transmission & Distribution* from a library/subscriber pays model to an author-pays Open Access (OA) model effective from the 2021 volume, which comes into effect for all new submissions to the journal from **now**.

Whilst transitioning to OA as well as collaborating with a new publishing partner, *IET Generation, Transmission & Distribution* will also be migrating to a new electronic peer-review management system, using ScholarOne. **The ScholarOne site is now open for all new submissions.** Please note that any papers that have been submitted in the journal prior to 1 August 2020 will continue to run in ReView.

For further information on Article Processing Charges (APCs), Wiley's transformative agreements, Research 4 Life policies, please visit our [FAQ Page](#) or contact journals@theiet.org

COVID-19: A Message from the IET Journals Team We would like to reassure all of our valued authors, reviewers and editors that our journals are continuing to run as usual but, given the current situation, we can offer flexibility on your deadlines if you should need it. Our systems are set up to work to fixed timescales and may issue automatic reminder emails – please do not hesitate to get in contact with us at iet_gtd@theiet.org if you need an extension or to discuss options. We recognise the tremendous contribution that you all make to the IET journals and would like to take this opportunity to thank you for your continued support.

IET Generation, Transmission & Distribution is intended as a forum for the publication and discussion of current practice and future developments in electric power generation, transmission and distribution. Practical papers in which examples of good present practice can be described and disseminated are particularly sought. Papers of high technical merit relying on mathematical arguments and computation will be considered, but authors are asked to relegate, as far as possible, the details of analysis to an appendix.

News: We would like to congratulate one of our Editors-in-Chief, Dr Innocent Kamwa, on winning the 2019 IEEE Charles Proteus Steinmetz Award and the 2019 IEEE PES Charles Concordia Power System Engineering Award.

The IET has now partnered with Publons to give you official recognition for your contribution to peer review. [Read more...](#)
