Total Ionizing Dose Effects Investigation on the Performance of MEMS Microphone Irradiated by γ -Ray

by Panfeng Zhang et al.
Appl. Syst. Innov. 2026, 9(5), 97; <https://doi.org/10.3390/asi9050097> (registering DOI)
 Published: 9 May 2026

Review
An Overview of the Application of Modern Statistical Techniques in Semiconductor Manufacturing

by Hsuan-Yu Chen and Chiachung Chen
Appl. Syst. Innov. 2026, 9(4), 83; <https://doi.org/10.3390/asi9040083>
 Published: 21 April 2026

Systematic Review
Hybrid Approaches of Machine Learning Algorithms in Predictive Maintenance: A Systematic Literature Review

by Jorge Paredes et al.
Appl. Syst. Innov. 2026, 9(5), 90; <https://doi.org/10.3390/asi9050090>
 Published: 29 April 2026

Article
Experimental Investigation of Manufacturing Constrained Induction Motor to PMSM Conversion for Direct-Drive Agricultural Ventilation Systems

by Ritthichai Ratchapan et al.
Appl. Syst. Innov. 2026, 9(5), 85; <https://doi.org/10.3390/asi9050085>
 Published: 25 April 2026

Applied System Innovation

Applied System Innovation (ASI) is an international, peer-reviewed, open access journal on integrated engineering and technology, published monthly online. It is the official journal of the International Institute of Knowledge Innovation and Invention (IIKI).

- Open Access** — free for readers, with article processing charges (APC) paid by authors or their institutions.
- High Visibility:** indexed within Scopus, ESCI (Web of Science), Inspec, Ei Compendex and other databases.
- Journal Rank:** JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Applied Mathematics)
- Rapid Publication:** manuscripts are peer-reviewed and a first decision is provided to authors approximately 22 days after submission; acceptance to publication is undertaken in 4.8 days (median values for papers published in this journal in the second half of 2025).
- Recognition of Reviewers:** reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
- Journal Cluster of Information Systems and Technology:** *Analytics, Applied System Innovation, Cryptography, Data, Digital, Informatics, Information, Journal of Cybersecurity and Privacy and Multimedia.*

Impact Factor: 3.7 (2024); 5-Year Impact Factor: 4.0 (2024)

Evaluating AI-Supported Learning in an Aviation Operations Course: Perceived Usefulness, Ease of Use, and Student Engagement

by Duen-Huang Huang and Yu-Cheng Wang
Appl. Syst. Innov. 2026, 9(5), 105; <https://doi.org/10.3390/asi9050105> - 21 May 2026

Abstract While the use of artificial intelligence (AI) in higher education is widespread, students' experiences with AI-supported learning in their regular courses remain underexplored. Objective: This research examines the relationships among perceived usefulness, perceived ease of use, and academic engagement among undergraduate students enrolled [...] Read more.

An AI-Driven Decision Support System for Sustainable Smart Clothing Design Based on Flexible Material Properties and Environmental Metrics

by Fang Zheng, Yanping Lu, Junghee Lee, Hongyan Liu, Dandan Wang and Myun Kim
Appl. Syst. Innov. 2026, 9(5), 104; <https://doi.org/10.3390/asi9050104> - 20 May 2026

Abstract With the rapid expansion of the smart clothing market, designers face increasing pressure to balance functional performance, material suitability, environmental impact, and development efficiency. Conventional design workflows and rule-based assistance methods often struggle to provide adaptive and data-driven support for multi-constraint decision-making. To [...] Read more.

A Hybrid SBERT-WGAN Framework with Ensemble Learning for Sentiment Analysis in Imbalanced Datasets

by Hamza Jakha, Sanae Tbaikhi, Souad El Houssaini, Mohammed-Alamine El Houssaini and Souad Ajjaj
Appl. Syst. Innov. 2026, 9(5), 103; <https://doi.org/10.3390/asi9050103> - 19 May 2026

Abstract Sentiment analysis has become increasingly important across various domains, particularly in business intelligence, where it is crucial for improving the performance of companies by identifying the sentiments and emotions expressed in customer feedback on products and services. Despite its growing relevance, sentiment analysis [...] Read more.

PID Plus Adaptive Neural Network Control for Trajectory Tracking in Robotic Manipulators: Application to Automated Tape Laying (ATL)

by José F. Villa-Tiburcio, Rodrigo Hernández-Alvarado, Antonio Estrada, Cristian H. Sánchez-Saquín and Teresa Hernández-Díaz
Appl. Syst. Innov. 2026, 9(5), 102; <https://doi.org/10.3390/asi9050102> - 18 May 2026

Abstract This article addresses the challenge of positioning accuracy in robotic manipulators applied to automated tape placement (ATL). A hybrid control strategy is proposed that integrates a Proportional-Integral-Derivative (PID) controller with a Backpropagation Neural Network (BP-NN). The proposed approach, called PID + NN, acts [...] Read more.

LLM-SSHH: An LLM-Powered SSH Honey-pot Framework via State Snapshot

by Xiang Li, Nanfang Li, Zongrong Li, Lijun Yan, Denghui Ma, Haishan Cao, Xu Wang and Yu Liu
Appl. Syst. Innov. 2026, 9(5), 101; <https://doi.org/10.3390/asi9050101> - 18 May 2026

Abstract SSH honeypots serve as critical infrastructure for cyber threat intelligence, but existing LLM-based systems suffer from context window limitations causing state loss and hallucination-driven inconsistencies, making them easily detectable through simple verification tests. To address these limitations, we propose LLM-SSHH, a framework combining [...] Read more.

A Multi-Model CNN Approach Using Pre-Trained Network for Improved Hand Gesture Recognition

by Yeou-Jiunn Chen, Aryanti Aryanti and Qian-Bei Hong
Appl. Syst. Innov. 2026, 9(5), 100; <https://doi.org/10.3390/asi9050100> - 13 May 2026

Abstract Hand gesture recognition (HGR) is a critical area in computer vision that supports intuitive human-computer interaction and sign language communication, yet existing systems remain sensitive to lighting variations, background clutter, and diverse hand postures. This study introduces two contributions to address these limitations: [...] Read more.

AI-Driven Decision Support Beneath Uncertainty: A Hybrid Bayesian-PLS Model for Systemic Sustainability Innovation

by Mostafa Aboulnour Salem
Appl. Syst. Innov. 2026, 9(5), 99; <https://doi.org/10.3390/asi9050099> (registering DOI) - 12 May 2026

Abstract This study examines Responsible Decision-Making (RADM) in AI-enabled sustainability within tertiary education under conditions of uncertainty and complex interdependence. Conventional analytical approaches are limited in such settings because they typically explain behavioural relationships without adequately modelling uncertainty. To address this limitation, the study [...] Read more.

Maritime Integrated Systems Architecture in the Digital Era: A Systematic Review of Model-Based Approaches, Interoperability, and Resilience

by Ernesto José García Fernández de Castro, Leonardo Lizcano, Daladier Jabba, Miguel Jimeno, Wilson Nieto Bernal and Andrés Pedraza
Appl. Syst. Innov. 2026, 9(5), 98; <https://doi.org/10.3390/asi9050098> (registering DOI) - 12 May 2026

Abstract Background: Maritime operations increasingly rely on integrated, secure, and resilient architectures, yet the associated body of knowledge remains fragmented across conceptual, operational, logical, methodological, and governance-oriented perspectives. Objective: Our aim is to systematically review the literature on maritime integrated systems architecture in order [...] Read more.

Total Ionizing Dose Effects Investigation on the Performance of MEMS Microphone Irradiated by γ -Ray

by Panfeng Zhang, Xuecheng Du, Chao Ma, Yiran Wu, Zhenya Li, Hao Yun, Jiajun Wei and Zhirui Zheng
Appl. Syst. Innov. 2026, 9(5), 97; <https://doi.org/10.3390/asi9050097> (registering DOI) - 9 May 2026

Abstract Data collected by sensors plays a critical role in system decision-making. Microphone arrays enable distance measurement and fault localization, which is particularly critical in the radiation environments of nuclear facilities. Acoustic localization based on microphone arrays can effectively fulfill this requirement. This study [...] Read more.

A Systematic Review of Eco-Adaptive Cruise Control for Electric Vehicles: Control Strategies, Computational Challenges, and the Simulation-to-Reality Gap

by Mostafa A. Mahdy, A. Abdellatif and Mohamed Fawzy El-Khatib
Appl. Syst. Innov. 2026, 9(5), 96; <https://doi.org/10.3390/asi9050096> (registering DOI) - 30 April 2026

Abstract Energy-aware Adaptive Cruise Control (Eco-ACC) has become an essential approach for enhancing the energy efficiency of electric vehicles while ensuring safe and comfortable driving. This paper presents a systematic review, following the PRISMA methodology, of 60 recent studies published between 2021 and 2025. [...] Read more.
